DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 15-17, 27-29, and 35-39, drawn to microphone adapter and claims 18-20, and 30-34, drawn to the combination of a respirator with the microphone adapter, classified in class 128, subclass 201.19.
- II. Claims 15-17, 21-29, and 35-39, drawn to battlefield communication with adapter, classified in class 128, subclass 201.29.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in aviation, invention I is not required to be used in battlefield settings with headset and digitally encrypted radio. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3743

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
